Allowable Subject Matter

1. Claim 2 is allowed.

2. The following is an examiner's statement of reasons for allowance: The prior arts teach the output of a random number generator to assemble a data encryption key (DEK), for example, Barkan (5,864,667). The prior arts also teach sampling an output of a random number generator to assemble a KEK, for example, Barkan (5,864,667). In addition prior arts teach the method of managing encryption keys supporting an internally generated storage variable, a local storage variable and a user application generated KEK, for example, Barkan (5,864,667). However, the prior arts of record taken alone or in combination fail to teach, anticipate, suggest, or render obvious the claimed invention. The method step claimed is not anticipated nor rendered obvious by the prior arts. The prior arts taken singly or in combination do not teach the step of generating a key. Specifically, the prior arts taken singly or in combination do not teach, anticipate, suggest, nor render obvious the combined steps of managing encryption keys by generating a key through the 1) sampling of a random number generator to form a DEK, 2) sampling of a random number generator to form a KEK, 3) performing a Diffie-Hellman exponential to derive a shared value, 4) transforming an existing key, 5) deriving a symmetric secret key by hashing, and importing an unencrypted (RED) key provided by the application. Consequently, claim 2 is allowed over the prior arts of record.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
